-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 1-3 are rejected under 35 U.S.C. 101 because the claim is directed to a recording medium storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical "things" nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEP 2106.IV.B.1.

Allowable Subject Matter

3. Claims 4-17 contain allowable subject matter over the prior art of record.
4. The following is a statement of reasons for the indication of allowable subject matter:

The claimed invention is directed to a method of merging a plurality of bit streams having time information units inserted at predetermined interval. The independent claims identify the feature of "the control information being inserted at a boundary between adjacent ones of the plurality of bit streams, the control information representing whether the time information units of adjacent merged bit streams are temporally discontinuous". The closest prior art, Kato et al discloses a conventional

remultiplexing apparatus, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lu et al discloses a system for re-encoding segments of buffer constrained video streams.

Kato et al discloses a remultiplexing apparatus.
